

4/26/2018

Dear River Hills Resident.

Range Line Rd. between County Line Rd and Brown Deer Rd. is going to be repaved during the summer of 2018. The paving process will involve four basic steps.

1. Existing pavement will be pulverized and left in place.
2. Pulverized material will be graded, watered and rolled.
3. New pavement placed.
4. Shouldering stone placed.

Prior to the street reconstruction, the department of public works will be upgrading manholes within the street pavement footprint. The work will be performed without closing the street. The approximate locations of manhole are indicated on the map.

The work will be noticed and possibly inconvenient but we will try to be as quick as possible. Thank you in advance for your patience and understanding.

Please call the dpw with questions or concerns.

Kurt Fredrickson o- 414-352-0080 c-414-651-8586
