

# ROAD PROJECTS 2020

Range Line Rd from Brown Deer Rd south to the village limits is scheduled to be resurfaced in 2021.

To prepare for this project the public works dept. has re-built the sewer manholes and is in the process of replacing the rusted cross culverts which there are six of them. The culvert replacement should be completed by early July.

Greenbrook Rd between Range Line Rd and Upper River Rd is also to be resurfaced in 2021.

The public works dept will be rebuilding the sewer manholes and checking the cross culverts in this area also.

**Ditch cleaning projects will be done these years as well.**

**Please slow down when passing our road crews in the work areas.**
